

C'mon everybody - trust is all we need
Let's work together to beat hunger and disease

When I check with my people
There we have a long way to go
But we are ready to move
We are ready for the show

C'mon everybody - trust is all we need
Let's work together to beat hunger and disease

People from the North
They don't know our reality
What they do with their money
They may spend it blindly

C'mon everybody - trust is all we need
Let's work together to beat hunger and disease

People from the North
Your rules are sometimes strange
Know us better
And these rules may change

C'mon everybody - trust is all we need
Let's work together to beat hunger and disease

Don't compete but pull together
Stop the waste of foreign aid
We are there to make sure
That there is no longer so much waste

C'mon everybody - trust is all we need
Let's work together to beat hunger and disease

Our Governments they talk sweet
But they rarely deliver the meat
Hey Mr. President, plan together with your folks
Let us be part and parcel of your talks

C'mon everybody - trust is all we need
Let's work together to beat hunger and disease

Make Accra more than a sweet talking shop
Let's have a change - Let's do the hop
More effective we should work
Let's beat together hunger and dirt

C'mon everybody - trust is all we need
Let's work together to beat hunger and disease
