

**SABER-ICT**

**Systems Approach for Better Education Results (SABER): The Use of ICTS**

**Draft working document**

**Master list of ICT/education policy documents (version 0.6 updated 30 January 2013)**

The World Bank's ICT/education team often gets asked by countries for examples of 'ICT and education policies' to help inform their own planning processes in this area. We get this request so often that we have decided to (more) systematically document and catalog these sorts of policy documents in the coming months, with the assistance of some of our partner organizations, and make them widely available as part of a global ICT/education policy database.

As part of a process of making the information we collect publicly available as early as possible, and to be more transparent about how we go about our work, we thought we would share version 0.6 of our master list of policy documents related to ICT/education from around the world. This activity is one part of a larger World Bank initiative, Systems Approach for Better Education Results: The Use of ICT ([SABER-ICT](#)).

For more background on the types of documents we are collecting, and how we are doing so, please see the related post on the World Bank EduTech blog, *How to identify and locate national ICT and education policies* [<http://blogs.worldbank.org/edutech/finding-policies>].

*Please note:* This list is far from complete. Some of the items listed here may not be labeled correctly. Some of the translations of document titles into English may not be exact. In addition to policy documents from specific countries, the list also includes global and regional documents of potential relevance.

Please feel free to tell us what we're missing, and/or what we've got wrong, by making a comment on the related page on the World Bank EduTech blog, *How to identify and locate national ICT and education policies* [<http://blogs.worldbank.org/edutech/finding-policies>], via our online contact form [<http://blogs.worldbank.org/edutech/contact>] or on Twitter (please reference @WBedutech).

*Note:* A number of online resources have been invaluable in helping to put together this list. Especially notable in this regard are the online resources from GeSCI, UNESCO-Bangkok, the European Schoolnet, Comunit, Eldis and Zunia. In addition, we note the tremendous value of a print publication: the revised second edition of *Cross-National Information and Communication Technology Policies and Practices in Education* (Plomp, Anderson, Law, eds.). This draft working document is available through the SABER-ICT page on the World Bank education website: <http://go.worldbank.org/BKW0E2VTX0>

Thanks! - the ICT/education team in the World Bank Education Sector Anchor Unit (HDNED)

---

Note: Countries and territories are listed alphabetically. Where these countries and territories are listed on the official list of client countries maintained by the World Bank (see <http://www.worldbank.org/countries>), we have adopted official World Bank terminology. In some cases, individual regions of territories of note have also been listed, where these places may have ICT/education-related policy documents that may be relevant to the SABER-ICT initiative.
