

# A Shared Technology Platform for Microfinance

George Conard

*Director, Mifos Initiative*

*Grameen Foundation*

# Current tech paradigm failing

- Too many MFIs have no system
  - Barrier to growth
  - Impedes analysis
- Too many MFIs have custom systems
  - Often poorly built
  - Redundant effort (and spend)
- Poor support for existing systems

# A common platform is needed

- Common technology infrastructure
  - Innovations scale up and out
  - Technology that evolves with microfinance
  - Reduce individual and global costs
- Bring focus to the right places
  - Innovate on business models and new ideas
  - Do what you do best
  - Lay a solid foundation for future growth

# Open systems enable new models

- New business models
- New delivery models
- Build local capacity
- Empower microfinance practitioners

# Mifos

- Open source technology platform for microfinance
- Available today – growing into the future
- Technology AND support network
- A solid foundation to build upon
