1/ IDA allocations are made on a fiscal year basis, while the CPRs are calculated on a calendar year basis. The 2006 CPR data are used to determine FY08 allocations, the 2007 data for FY09 allocations, and the 2008 data for FY10 allocations.

2/ The CPR formula was modified during IDA15 (FY09-11), specifically with respect to the method used for calculating portfolio and governance ratings. The methodological changes led to changes in the CPR ratings for countries. To make the data comparable across years, the 2006 CPR are restated using the modified IDA15 formula. For details on the new IDA15 formula, see "Additions to IDA Resources: Fifteenth Replenishment," Annex 1.

3/ Inactive IDA countries.
