

WATER IN THE ARAB WORLD

MANAGEMENT PERSPECTIVES AND INNOVATIONS

Edited by Vijay Jagannathan, Ahmed Shawky and Alex Kremer

Water in the Arab World documents the existing "embedded knowledge" that has been generated by World Bank-financed projects dealing with water management challenges in countries of the Middle East and North Africa region. As such, this is not a conventional book, but a compendium of ideas, analysis and reflections as captured by World Bank staff reflecting the creativity and variety of solutions developed by professionals and likewise communities across the region.
