PEACELAND

*Conflict Resolution and the Everyday Politics
of International Intervention*

Peaceland suggests a new explanation for why international peace interventions so often fail to reach their full potential. Based on several years of research in conflict zones around the world, this book demonstrates that everyday elements- such as the expatriates' social habits and usual approaches to understanding their areas of operation - strongly influence peacebuilding effectiveness. Through an in-depth analysis of the interveners' everyday life and work, Peaceland proposes innovative ways to better help host populations build a sustainable peace.

CHAIR

Shanta Devarajan
