

Youth in Post-Conflict Reconstruction *Agents of Change*

by **Stephanie Schwartz**

In the post-conflict population, youth constitute a reservoir brimming with potential energy, ready to be channeled for good or ill. What causes some young people to return to the life of a fighter while others choose to work for a better future? And what can domestic and international actors do to help youth access quality education, work to support their families, and become active contributors to building peace and reconstructing their countries?
