ATTACKING INEQUALITY IN THE HEALTH SECTOR
A Synthesis of Evidence and Tools
By Abdo S. Yazbeck

This book distills the operational knowledge relevant to attacking health sector inequality and uses available empirical evidence that answers two critical questions: Why is there persistent inequality in health care? What can be done about it?

Using 14 evaluated, proven successes and an exhaustive literature review, this book serves as a practical "how to" manual for defining, understanding, and effectively addressing the problem of inequality in health service use.
