

Perspectives on Global Development 2012

Social Cohesion in a Shifting World

Building a cohesive society requires fostering equal opportunities, trust and social mobility. OECD's new *Perspectives on Global Development: Social Cohesion in a Shifting World 2012* examines the challenges and opportunities for social cohesion in fast growing countries and proposes an integrated policy framework for a sustainable, more cohesive policy agenda. Participants will discuss the findings of the report and their potential for implementation.
