Edited by Volker Treichel

Putting Nigeria to Work: A Strategy for Employment and Growth looks at the ways in which Nigeria's improved economic performance has impacted the labor market. It proposes a strategy that will allow Nigeria to increase the availability of quality jobs, reduce rising youth unemployment, and sustain and further accelerate the country's growth performance. At the core of this strategy are targeted interventions aimed at removing binding constraints to growth in sector of the economy that are already growing fast, but have the potential to grow faster and have significant employment potential.
