Acknowledgements

This report has received valuable guidance from Dr. Aun Porn Moniroth (Chairman of SNEC and Secretary of State of the Ministry of Economy and Finance), Dr. Hang Chuon Naron (Secretary General of the Ministry of Economy and Finance), H.E. Vongsey Vissoth (Deputy Secretary General of the Ministry of Economy and Finance), H.E. Chan Tong Yves (Secretary of State of the Ministry of Agriculture, Forestry and Fishery), H.E. Sok Chenda (Secretary General of the CDC), H.E. Chhieng Yanara (Deputy Secretary General of the CDC), Heang Siekly (Deputy Director General, Ministry of Planning), Ly Sina (Division Director, Department of Forestry, Ministry of Agriculture, Forestry and Fisheries), Nhean Sochetra (Director of Gender Equality Department, Ministry of Women's Affairs), Chhuon Chham (Deputy Secretary-General, Council for Administrative Reform) and Uch Sarom (Consultant, Ministry of Women's Affairs / UNDP).

Earlier drafts were peer-reviewed by Louise Cord and Kathy Lindert (both World Bank), Shyam Bajpai (ADB), Hong Sokheang (UNDP), Helen Appleton (DFID), Sok Hach and Lim Visal (EIC), and Brett Ballard, Larry Strange, and So Sovannarith (CDRI). We gratefully acknowledge inputs and contributions including suggestions from Yusuf Ahmad, Enrique Aldaz-Carroll, Anne Christensen, Elisabet Dahlberg (Stockholm School of Economics), Dourng Kakada (EIC), Ignas Dümmer (Danida), Eiichiro Hayashi (JICA), John McAndrew (ADI), Tomoki Fujii, the staff of UNFPA, Didier Grebert (AFD), Roger Hencke (CAS), Jolanda Jonkhart (EC), Long Piseth (Danida), Caroline McCausland (Concern Worldwide), Roneen Marcoux (NEP), Karla Quizon (IFC / MPDF), Neak Samsen (EIC), John Nelmes (IMF), Nou Keosothea (EIC), Michael Stephen (Mekong Bank), Thomas Markussen, Vijay Rao (WHO), Mao Moni Ratana (ADB), Ram Saravanamuttu (WFP), Sofia Sebastian, Carol Strickler (CCC), Emi Uchida, Hirotsugu Uchida and Cheryl Urashima.

The report was prepared under the overall coordination and guidance of Indermit Gill, Sector Manager, and Nisha Agrawal, Country Manager. The Executive Summary was written by Tim Conway and Chorching Goh; Chapter 1 by Tim Conway; Chapters 2 and 3 by Chorching Goh; Chapter 4 by Eric Sidgwick; Chapter 5 by Chorching Goh with Chris Jackson (Rural Development) and Chan Sophal; and Chapter 6 by Tim Conway and Toomas Palu (Human Development) with Andy Ragatz (Consultant); Chapter 7 by Tim Conway; and Chapter 8 by Tim Conway, Mia Hyun and Makiko Harrison (World Bank). The data annexes were prepared by Chea Huot.

Inputs were provided by many others in the World Bank team, including Daniel Adler (SD), Beng Simeth (HD), Luis Benveniste (HD), Amitava Biswas (Consultant), Ximena del Carpio (HD), Klaus Deininger (DEC), Gershon Feder (DEC), Mona Haddad (PREM), Minna Hahn (HD), Huot Chea (PREM), Stephen Mink (RD), Nil Vanna (Social Development), Steven Noakes (Consultant), Nat Pinnoi (EAS), Steven Schonberger (RD), Dean Spinanger (Consultant), and Rob Taliercio (PREM). Overall guidance was also provided by Ian Porter (Country Director, Cambodia) and Kazi Mahbub-Al-Matin (Lead Economist, Cambodia). The 2004 national poverty estimates on which this report draws heavily were prepared by Jim Knowles (Consultant), in a technical report which will be published separately.

Bou Saroeun (Communication Specialist) coordinated the editing and production of the Khmer version of the Report. Assistance on the preparation of the report was also provided by Iv Ek Nimnuon and Zelena Jagdeo.

The key sources of data for this report were the Cambodia Socio-Economic Survey (CSES) 2004, conducted by the National Institute of Statistics (NIS); the Moving Out of Poverty Study (MOPS) and Tonle Sap Participatory Poverty Assessment (PPA), both conducted by the Cambodian Development Resource Institute (CDRI); and four District-level case studies of local differences in growth and poverty reduction, conducted by the Economic Institute of Cambodia (EIC). The CDRI MOPS study and the EIC District-level economic appraisals were both commissioned by the World Bank as inputs to this Poverty Assessment. It is intended that both will be published by their respective institutions as separate research papers in 2006. The CDRI Tonle Sap PPA was commissioned by ADB: our thanks go to both CDRI and ADB for permission to use early findings from this study in this report.

TABLE OF CONTENTS

EXECUTIVE SUMMARY

| | |
|---------------------------------------|------|
| Overview | i |
| Structure and sources..... | ii |
| Key facts..... | iii |
| Diagnosis | vi |
| Binding constraints..... | x |
| Taking stock and looking forward..... | xiii |
| Policy priorities | xvi |

CHAPTER 1: Country Context

| | |
|----------------------------------|----|
| Summary..... | 1 |
| Geography and opportunity | 2 |
| The legacy of history | 4 |
| Subject matter and sources | 12 |
| Summary..... | 15 |

CHAPTER 2: Poverty trends, 1994-2004

| | |
|--|----|
| Summary..... | 17 |
| Tracking poverty over time | 18 |
| Key findings | 21 |
| Moving in and out of poverty: panel data analysis..... | 30 |

CHAPTER 3: The nature of poverty in Cambodia, 2004

| | |
|---|----|
| Summary..... | 35 |
| Household consumption | 36 |
| Poverty in 2004..... | 37 |
| Household poverty profile..... | 41 |
| Urban poverty: lack of secured housing and insecurity of income | 47 |
| Inequality is high | 49 |
| Vulnerability..... | 51 |

CHAPTER 4: Sources of economic growth

| | |
|---|----|
| Summary..... | 55 |
| Retrospective on economic growth | 56 |
| Agriculture..... | 58 |
| Industry..... | 64 |
| Binding constraints to agricultural and agri-business growth | 72 |
| Second-order constraint to agri-business growth: high cost of capital | 76 |

CHAPTER 5: Raising agricultural incomes

| | |
|---|----|
| Summary..... | 77 |
| Agricultural sector..... | 78 |
| Crop yields are among the lowest in the region..... | 79 |
| The natural resource base..... | 80 |
| Fishery sector..... | 81 |
| Forestry sector..... | 83 |
| Land: the primary asset of the poor..... | 84 |
| Factors to enhance agricultural productivity..... | 88 |

CHAPTER 6: Education, health and wealth

| | |
|-----------------------------------|-----|
| Summary..... | 93 |
| Education, skills and growth..... | 94 |
| Health and wealth..... | 110 |

CHAPTER 7: Building an effective and responsive state

| | |
|---|-----|
| Summary..... | 131 |
| Building state institutions and public sector capacity..... | 132 |
| Voice, participation and social accountability..... | 147 |

CHAPTER 8: New partnerships for poverty reduction

| | |
|---|-----|
| Summary..... | 155 |
| Will Cambodia meet its poverty reduction targets?..... | 157 |
| The NSDP and CMDGs..... | 159 |
| Supporting the NSDP: aid effectiveness in Cambodia..... | 161 |
| Aid and poverty reduction, 1993-2004..... | 163 |
| Monitoring and evaluating progress..... | 171 |

List of Figures

| | | |
|-------------|---|------|
| Figure 1: | Over the last decade, poverty in Cambodia has fallen by an Estimated 12 percentage points | i |
| Figure 2: | Household consumption has risen 32 percent in real terms | iii |
| Figure 3: | The poorest fifth of the population own more assets and have better access to electricity than ten years ago | iv |
| Figure 4: | The poorest 20 percent also live in better houses than in the past | iv |
| Figure 5: | Cambodia has been remarkably effective in slowing and reversing the spread of HIV | v |
| Figure 6: | Industry’s contribution to GDP has doubled -- but it still employs only 8 percent of the workforce | vii |
| Figure 7: | Yields of rice—Cambodia’s food staple—are very low compared to neighboring countries | viii |
| Figure 8: | Cambodia has yet to achieve the sustained high rates of agricultural growth associated with long-term economic development | viii |
| Figure 9: | Common property resources—fishing and forestry—are very important to the poorest quintile, but only marginally important for the richest quintile | x |
| Figure 10: | Higher agricultural growth would deliver the property reduction goal faster | xiv |
| Figure 11: | Small farms are a better economic proposition than large farms ... | xvii |
| Figure 1.1: | Cambodia benefits from access to the sea, rich freshwater fisheries, and economic growth in neighboring countries..... | 3 |
| Figure 1.2: | Landscape and natural resources shapes spatial variations in Cambodia’s economic and social development | 14 |
| Figure 2.1: | Between 1994 and 2004, poverty fell by an estimated twelve percent | 18 |
| Figure 2.2: | Poverty—and food poverty—has fallen in both urban and rural areas | 23 |
| Figure 2.3: | The depth of poverty has declined in both the towns and the countryside..... | 23 |
| Figure 2.4: | Per capita consumption increased significantly over the last ten years..... | 24 |
| Figure 2.5: | Consumption has risen in rural areas—but more slowly than in urban areas..... | 24 |
| Figure 2.6: | Households—including poor households—can now afford to spend more on non-food items | 25 |
| Figure 2.7: | The poorest fifth of the population own more assets and have better access to electricity than in 1994 | 26 |
| Figure 2.8: | The poorest 20 percent also live in better houses than in the past ... | 26 |
| Figure 2.9: | Net primary enrolment has improved for all groups | 27 |

| | |
|---|----|
| Figure 2.10: Over the last ten years, per capita consumption amongst the poorest fifth has risen by only 8 percent—compared to 45 percent amongst the richest fifth of the population | 27 |
| Figure 2.11: Poverty has fallen much faster in Phnom Penh and the coast | 28 |
| Figure 2.12: Inequality rose in rural areas, and in the country as a whole | 29 |
| Figure 2.13: Household dynamics and the changing composition of income, 2001-2004 | 34 |
| | |
| Figure 3.1: Rural Plateau and rural Tonle Sap regions had the lowest average of consumption | 36 |
| Figure 3.2: Per capita consumption in upland areas is only 75 percent of the national average..... | 36 |
| Figure 3.3: Standards of living are lowest in the Mountain/Plateau and Tonle Sap regions | 37 |
| Figure 3.4: The majority of the poor are found in the Plains and Tonle Sap Provinces | 39 |
| Figure 3.5: Poverty rates are highest in Kampong Speu, Siem Reap and Kampong Thom provinces | 40 |
| Figure 3.6: Households headed by men and women in the prime of their life (aged 30-50 years) made up the largest proportion of the poor and experience the highest rates of poverty | 40 |
| Figure 3.7: There is no statistical difference in the CSES data between the incidence of poverty in male-and female-headed households... | 41 |
| Figure 3.8: Larger households tend to be poorer because of higher dependency ratios | 44 |
| Figure 3.9: Households headed by domestic workers and farmers are much more likely to be poor..... | 45 |
| Figure 3.10: The poorest infrastructure is to be found in Provinces in the Mountain/Plateau region and Siem Reap Province..... | 46 |
| Figure 3.11: The poor are acutely deprived of energy, water and sanitation..... | 46 |
| Figure 3.12: The poorest and next poorest quintiles are less likely to have secure land titles..... | 47 |
| Figure 3.13: Inequality in Cambodia is high, particularly in urban areas..... | 49 |
| Figure 3.14: Inequality in Cambodia is high compared to its regional neighbors | 50 |
| Figure 3.15: Distribution of household consumption and vulnerability | 52 |
| | |
| Figure 4.1: Contribution to real GDP growth | 56 |
| Figure 4.2: Sub-sector contribution to agricultural sector growth | 58 |
| Figure 4.3: Land is being brought into agricultural production, mainly through conversion from forest-‘000 hectares | 60 |
| Figure 4.4: Growth diagnostics | 73 |
| | |
| Figure 5.1: Agriculture and access to natural resources is critical for the poor.. | 78 |
| Figure 5.2: Revenue from timber and non-timber products..... | 84 |

| | |
|---|-----|
| Figure 5.3: Small farms are a better economic proposition than large farms | 87 |
| Figure 6.1: Public expenditure on education—particularly on recurrent costs—has risen dramatically | 96 |
| Figure 6.2: Primary education in Cambodia compares poorly with the rest of the region | 97 |
| Figure 6.3: Pronounced inequalities still exist in education outcomes | 98 |
| Figure 6.4: Children from poor families are much more likely to obtain a primary education in the south-east and north-west | 99 |
| Figure 6.5: Net primary enrolment has improved for all | 100 |
| Figure 6.6: Those with a good education are significantly less likely to be poor | 105 |
| Figure 6.7: Average wages and earnings increase with each stage of education completed..... | 106 |
| Figure 6.8: Cambodia has achieved remarkable success in reversing the spread of HIV | 112 |
| Figure 6.9: Malnutrition rates in Cambodia are extremely high..... | 113 |
| Figure 6.10: Poor and uneducated women have more children than other women | 117 |
| Figure 6.11: The level of a mother’s education is strongly and positively associated with the children’s immunization | 118 |
| Figure 6.12: Smoking is overwhelmingly a male habit, and strongly negatively influenced by education..... | 120 |
| Figure 6.13: Compared to the rich, the poor spend proportionately more on tobacco and less on medical care | 120 |
| Figure 6.14: Frequency (% individuals) and size (mean riels per capita shown by size of circle) of out of pocket spending on health care in the last 4 weeks, by consumption quintile, 2004 | 123 |
| Figure 6.15: The 10 percent of the population with bad or very bad health account for 64% of total household spending on healthcare..... | 124 |
| Figure 6.16: Inadequate drug supply, cost of services and distance to facilities are seen as the key problems with health services..... | 125 |
| Figure 6.17: For the poor, distance to health facilities may be as important as the cost of care | 126 |
| Figure 7.1: Governance issues—corruption and bureaucracy—are seen as the most important obstacles to private sector development | 135 |
| Figure 7.2: Corruption is most pronounced in the courts—but corruption in education has the greatest direct impact..... | 143 |
| Figure 7.3: Channels for citizen demand may be either direct or indirect..... | 148 |
| Figure 8.1: Aid dependence in Cambodia: declining slowly but still high..... | 158 |
| Figure 8.2: Status of harmonization and alignment in 2004: selected indicators | 166 |

List of Tables

| | | |
|------------|---|------|
| Table 1: | Profile of the poor in 2004..... | v |
| Table 2: | The rate of poverty reduction has been good—but a number of other countries have done better | xiii |
| Table 2.1: | Updated food poverty line, nonfood allowances, and total poverty lines | 21 |
| Table 2.2: | Transition matrix of panel households | 31 |
| Table 2.3: | Changes in per capita consumption and in positions within the income distribution of panel households, 2001-2004 | 32 |
| Table 3.1: | Poverty headcounts are highest in the rural areas of the Tonle Sap and Mountain/Plateau regions, which together account for almost half of all poor | 39 |
| Table 4.1: | Sources of Growth by main economic activity, 1994-2004 | 57 |
| Table 4.2: | Agricultural sector performance during early stages of development. | 59 |
| Table 4.3: | Compared to its neighbors, Cambodia has very little irrigated arable land)..... | 61 |
| Table 4.4: | Most crop yields did not improve over the last decade, with the exception of maize..... | 63 |
| Table 4.5: | Growth in domestic tourists is increasingly important in recent years..... | 70 |
| Table 5.1: | Food production and consumption for rural households by quintile... | 79 |
| Table 5.2: | Agriculture productivity for Cambodia and other countries, 2003 | 79 |
| Table 5.3: | Rice constitutes the bulk of farm households’ agricultural revenue in Cambodia | 80 |
| Table 5.4: | Rice still nominates crop production in Cambodia | 81 |
| Table 5.5: | Comparison of fishing and non-fishing households by income and consumption | 83 |
| Table 5.6: | Estimated effects of road infrastructure and human capital on agricultural productivity | 91 |
| Table 6.1: | There have been significant improvements in education infrastructure..... | 97 |
| Table 6.2: | Child labor rates in Cambodia are amongst the highest in Southeast Asia | 103 |
| Table 6.3: | The children of educated mothers are much less likely to be malnourished | 107 |
| Table 6.4: | Despite gains, Cambodia has some of the lag behind health outcomes in the region..... | 110 |

| | |
|---|-----|
| Table 6.5: Communicable diseases are the main cause of illness for all groups—although non-communicable illnesses are becoming significant for the rich | 111 |
| Table 6.6: Mean rates (%) of moderate and severe malnutrition among children under 5 by p.c. consumption quintile, 2004 | 114 |
| Table 6.7: The poor are much less likely to seek healthcare when ill | 121 |
| Table 6.8: Outside Phnom Penh and the Tonle Sap provinces, wealth makes a big difference to healthcare utilization | 122 |
| Table 6.9: Individuals in the richest quintile are five times more likely to use hospital services than individuals from the poorest two quintiles | 122 |
| Table 7.1: The business climate in Cambodia is far less attractive than the regional average..... | 134 |
| Table 8.1: The rate of poverty reduction has been good but a number of other countries have done better | 157 |
