

Macroeconomic Indicators – Definitions and Sources

Data is compiled from various sources, including Datastream and the International Monetary Fund, and then processed further by the World Bank's Prospects Group (DECPCG)

Note: Indicators are shown in order of appearance, first from the “Domestic” table, then from the “External” table. Definitions and sources for “External” indicators are found beginning on page 19.

A. Domestic - Definitions

Ind Prod, % = Industrial production (IP), annual percent growth. In some countries where IP data is unavailable, relevant proxies, such as oil production are used.

CPI, % = Consumer price index annual percent growth

M2/reserves = Broad money (M2) as a ratio to foreign exchange reserves

M2-multiplier = Broad money (M2) as a ratio to base money

Real deposit rate = Real interest rates on bank deposits in percent points (CPI deflator)

B. Domestic - Sources

Shown in order: *Industrial Prod, CPI, M2/Reserves, M2-multiplier, Real deposit rate*

Industrial Production

<u>Country / Region</u>	<u>Variable name</u>	<u>Source</u>
Angola	AGOIPSA	u.s.department of energy (aopcobd.p.M) and DECPCG Staff
United Arab Emirates	AREIPSA	u.s.department of energy (uapcobd.p.M) and DECPCG Staff
Argentina	ARGIPSA	fiel (agiptot.g.M) and DECPCG Staff
Armenia	ARMIPSA	IFS (66...ZF) and DECPCG Staff
Asia	ASAIPSA	DECPCG defined aggregate
Australia	AUSIPSA	main economic indicators,copyright oecd (auopri35g.Q) and DECPCG Staff
Austria	AUTIPSA	main economic indicators,copyright oecd (oepri35g.M) and DECPCG Staff

C. External - Definitions

REER, % y/y = Real effective exchange rate, annual percent growth rates (a positive value indicates appreciation, and a negative value indicates depreciation)

Trade bal, \$bn = Merchandise goods trade balance in US dollar, billions

Ex vol, % y/y = Merchandise goods export volume growth, annual percent growth

Im vol, % y/y = Merchandise goods import volume growth, annual percent growth

Im-cover, mos = Stock of foreign exchange reserves expressed in the number of months of financing-coverage it represents for the given country's imports of merchandise goods

D. External - Sources

Shown in order: REER, Trade bal, Export and Import volume growth, Import-cover

Real Effective Exchange Rates (positive = appreciation, negative = depreciation)
