Working Paper No. 6
Contents

I. Introduction ............................................................................................................ 1
II. Key Findings ......................................................................................................... 1
III. Infrastructure, Environment, and Poverty Linkage ................................................ 4
IV. Data Collection ..................................................................................................... 5
V. Issues ................................................................................................................... 5

Annex A. Selected Tables Showing Collected Indicators................................................. 9
Annex B. Desk Review of Indicators Available Online .................................................. 23
Annex C. Thematic Maps of Cambodia, Lao PDR, and Mongolia ................................. 25

List of Figures
Figure 1. Rural Telephone Density ............................................................................... 1
Figure 2. Average Annual Cell Phone Cost .................................................................... 1
Figure 3. Rural Electrification Rate ............................................................................... 2
Figure 4. Cost of Rural Electricity .............................................................................. 2
Figure 5. Percentage of Rural Population with Access to Improved Water Source ............ 3
Figure 6. Average Rural Water Tariffs .......................................................................... 3
Figure 7. Percentage of Rural Population that Lives Fewer than
6 Kilometers from an All-Weather Road .................................................................... 3
Figure C.1: Cambodia: Total Population and Road Network ......................................... 26
Figure C.2: Cambodia: Incidence of Poverty by District and Road Network ..................... 27
Figure C.3: Cambodia: Population Without Access to Clean Water ............................... 28
Figure C.4: Cambodia: Population Without Toilets ....................................................... 29
Figure C.5: Cambodia: Incidence of Diarrhea in Children .............................................. 30
Figure C.6: Cambodia: Children Deaths .................................................................... 31
Figure C.7: Lao PDR: Incidence of Poverty and Road Network ....................................... 32
Figure C.8: Lao PDR: Population Without Access to Clean Water .................................. 33
Figure C.9: Lao PDR: Total Diarrhea Cases .................................................................. 34
Figure C.10: Mongolia: Road Network ......................................................................... 35

Tables
Table 1. Percentage of Data Not Available .................................................................. 6
Table A.1: National Health, Education, and General Poverty Indicators ....................... 10
Table A.2: Information, Communication, and Technology Indicators ............................ 12
Table A.3: Electricity and Heat Indicators ................................................................... 16
Table A.4: Water, Wastewater, Solid Waste, and Drainage Indicators ............................ 17
Table A.5: Roads and Transportation Indicators .......................................................... 21
Table A.6: General Indicators ...................................................................................... 22
Table B.1: Major Data Sources Used in Annex B. ......................................................... 23
Acknowledgements

This report was prepared by Daniel Hoornweg, EASUR, and Philip Lam, EASIN, in consultation with Michel Kerf and Philip Gray of EASIN. This report is consistent with a broader Infrastructure Indicators program currently being undertaken by EASIN. Management input was provided by Christian Delvoie, Sector Director, EASIN, and Keshav Varma, Sector Director, Urban, EASUR.

Valuable comments, data, and assistance were provided by Christina Malmberg Calvo and Peter Roberts, TUDTR; Vijay Jagannathan, Raja Iyer, and Inneke Herawati, EASUR; Imogene Jensen and William Paterson, EASTR; Salvador Rivera, EASEG; Tenzin Dolma Norbhu, CITPO; Santanu Lahiri and Rick Pollard, WSP-EAP; and Venkatesh Sundararaman, SASHD.

In Cambodia, Mr. Han Phounim, Mr. Shivakumar, and colleagues collected the data. They met with Mr. Chea Dara, Director, Department of Planning, Ministry of Industry, Mines, and Energy (MIME); Mr. Long Chitha, Deputy Director, National Institute of Statistics (NIS), Ministry of Planning (MOP); Mr. Un Pros, Senior Officer of the Ministry of Post and Telecommunications (MPT); Mr. Ouer Sophal, Vice Bureau Chief of NIS, MOP; Mr. Sao Chivoan, Director of Planning and International Cooperation, Ministry of Rural Development (MRD); Mr. Heng Ngoun Eng, Bureau Chief of Road Department, MRD; Mr. Mour KimSan, Deputy Director General, MRD; Mr. Sim Sovansomethea, Officer Angkor Telecommunication, MPT; Mr. Non Vanny, Vice Bureau Chief of Planning, MIME; Mr. Chea Bora, Deputy Director of Planning, Ministry of Land Management, Urban Planning, and Construction.

In Lao PDR, collection of data was managed by Steve Kirby. The following people provided valuable assistance: Mrs. Keobang A. Keola, Deputy Director General of the Cabinet, Prime Minister’s Office, Science, Technology and Environmental Agency (STEA); Mrs. Singkham Khongsavanh, Deputy Director General, Committee for Planning and Cooperation, Department of General Planning; Mr. Snith Xaphakdy, Director, Telecommunication Division, Department of Post and Telecom; Mr. Keovisouk Solaphom, Chief of Data Planning and Collection Section, Lao Telecommunications; Mrs. Phonesaly Souksavath, Deputy Director, and Mr. Yavang Vachoima, Head of Statistics Service Division, National Statistics Centre; Mr. Houmphone Bulaphol, Director-General, and Mr. Morten Larsen, World Bank consultant, Department of Electricity; Chantaphone Phanvisouk, Head of the Secretariat, Road Maintenance Fund; Mr. Souksakhone Soutannouvong and Mr. Sengphet Thanongsak, local consultants, Department of Roads, Local Roads Division, Participatory Rural Transport Planning; Mrs. Keoviengsan Khamkhosy, Director, Disbursement Division, Department of Roads; Dr. Soutsakhone Chanthaphone, Deputy Director, Dr. Bounpone Vannalath, Deputy Head of Administration Division, and Ms. Viengmala Sidanoumone, Planning and Statistics, National Centre for Environmental Health and Water Supply (Nam Saat); Santanu Lahiri, Country Team Leader, and Nalinthone Phonyaphanh, Program Assistant, WSP-EAP.

In Mongolia, Mr. Bill Murray, Managing Director of Murray Harrison Ltd., managed the collection of data with the assistance of Director of Monconsulting Ltd., Ms. S. Oyun, Mr. S. Chimid-Oidov, and Ms. B. Enkhjargal. Government officers who kindly provided information include Ms. B. Dulamjav, economist, Energy Regulatory Authority; Mr. R. Bud, Director, Road Agency; Mr. Enkhmend, Director, Telecommunications Regulatory Council; Mr. T. Enkhtaivan, Director, Fuel and Energy Authority; Mr. T. Narmandakh, Deputy Director, Ministry of Infrastructure, Information, Technology, and Policy Coordination Department; Mr. L. Demberel, Deputy Director, Information, Monitoring, Evaluation, and Economic Department; various officers of the Government Implementation Agency for Construction, Urban Development and Public Utilities, and the Mongolian Telecom Company.
