Current post: Principal Administrator, Information, Computer and Communications Policy Division, OECD, Paris.

Current and recent responsibilities: Head of the Information Economy Group and programme director for OECD information technology, e-business and industry programmes covering: E-business, information economy, intangibles and intellectual capital, new technologies, industrial performance, manufacturing flexibility, work organisation, industry globalisation. Most recent policy programmes on: electronic business, information economy, intangibles, firm organisation and employment, new growth industries, strategic business services and the environment supply industry.

Publications: Author of numerous OECD publications and articles. Presented papers at many international conferences on the information economy, technology strategies, sector developments and government policies. Books on information technology, business services, environment industry, globalisation, advanced manufacturing technology, diffusion of microelectronics, technology and investment, modernising manufacturing, high-tech industries and work organisation. Extensively analysed electronics and automobile industries.

Education:

- Ph.D. Chemistry, University of Adelaide, Australia (1972)
- B.A. Economics (Honours), University of Melbourne, Australia (1982).

Pierre Montagnier, economist, joined the OECD in 1992. He is currently working in the Information Computer and Communication Policy Division. He is contributing to the analytical and statistical work on the information economy and indicators on the information society, both from the supply and demand side (ICT sector, diffusion of ICT's within firms and households).

Between 2004 and 2006, he was detached to the SESSI (Service des Etudes et Statistiques Industrielles) in the French Ministry of Industry. He worked there on various research themes, including preliminary results of the annual Structural Business Statistics survey, industrial firms advertising expenditures, concentration, and industrial sub-contracting.

Selected publications (as contributor, co-author or author) : "L'industrie manufacturière en 2005" (July 2006); "La concentration des groupes, au centre des évolutions des secteurs de l'industrie" (June 2006); "La sous traitance industrielle - Un repli plus net que celui de l'activité" (August 2005); "Les dépenses de publicité dans l'industrie manufacturière" (March 2005); « OECD Information Technology Outlook » (2004, 2002, 2000); « OECD Science Technology and Industry Scoreboard » (2003, 2001); « Measuring the Information Economy » (2002).

Desirée van Welsum is an economist in the Information, Computer and Communications Policy Division at the OECD – Directorate for Science, Technology and Industry. She has recently authored reports on globalisation and offshoring of ICT-enabled services, the rise of India and the role of ICTs in structural employment changes. Her current projects include work on the economic and social impacts of ICTs and broadband communication networks, offshoring of ICT-enabled services to China, ICT-enabled globalisation of services, and ICT skills and employment.

Prior to coming to the OECD, Ms van Welsum was a member of the world economy macro-economic research and forecasting team at the UK National Institute of Economic and Social Research. She holds a MSc in Economics and International Economics from the University of Nottingham (UK) and from the University Paris IX Dauphine (France), and a PhD in Economics from Birkbeck College, University of London (UK).
