Preface for readers of this Draft:	3
Executive Summary	4
Preface: The process followed	13
1. The huge achievements of water development and management in India	14
(a) The era of large investments in major infrastructure	14
(b) The era of groundwater exploitation.....	21
2. Current and looming challenges	27
(a) Adjusting to the needs of a changing society	27
(b) Adjusting to scarcity and greater variability.....	30
(c) Dealing with growing conflicts	36
(d) Maintaining and renewing existing infrastructure	41
(e) Building infrastructure in under-served areas and for under-served public purposes	44
3. An invigorated Indian water state for the 21st century	53
(a) A state in disrepute	53
(b) The central institutional challenges in building “the new Indian water state”	54
(c) Instruments, not organizational forms, are key.....	55
(d) Stimulating competition in and for the market of water supply services.	57
(e) Empowering users by giving them clear, enforceable water entitlements	59
(f) Ending the culture of secrecy and making transparency the rule.....	64
(g) Introducing incentive-based, participatory regulation of services and water resources	65
(h) Putting the sector on a sound financial footing.....	67
(i) Investing heavily in human resource development	69
(j) Ensuring that local people are the first beneficiaries of major water projects.	70
(j) Making the environment a high priority	71
4. Principled pragmatism and “rules for reformers”	73
Rule # 1: Water is different.....	74
Rule # 2: Initiate reform where there is a powerful need and demonstrated demand for change.	74
Rule #3: Involve those affected, and address their concerns with effective, understandable information	75
Rule #4: Reform is dialectic not mechanical.....	77
Rule # 5: It’s implementation, stupid.....	78
Rule #6: Develop a sequenced, prioritized list of reforms	78
Rule #7: Be patient and persistent.....	79
Rule #8: Pick the low-hanging fruit first – nothing succeeds like success.....	79
Rule #9: Keep your eye on the ball – don’t let the best become the enemy of the good	79
Rule #10: There are no silver bullets.....	80
Rule #11: Don’t throw the baby out with the bathwater.....	81
Rule #12: Reforms must provide returns for the politicians who are willing to make changes.....	82
5. The evolving role of the World Bank	83
What the Bank has done in the past	83
The Bank’s new Water Strategy.....	86
The 2004 World Bank Country Assistance Strategy for India	86
The ongoing evolution of Bank engagement in the water sector in India	88
Endnotes	90
