

Job Title : **Environmental Expert (STC)**
Dept/Div : DSF
Appt Type : STC
Closing date : March 6, 2011
Location : Jakarta, Indonesia
Appointment : Local Hire

Decentralization Support Facility Terms of Reference Environmental Expert

I. Activity Summary

This activity seeks to improve the way natural resources are managed by local governments. More effective management will boost local economic development and provide additional revenue for local governments to finance service delivery. Towards this end, the activity will: (1) examine in a small number of local governments the ways in which a sample of natural resources is managed and consider means for improving such management; (2) propose organizational changes and capacity building measures at the local level that take into account important aspects of the political economy context and draw on comparative experience; (3) build local capacity for undertaking such organisational development in two pilot areas; (4) establish principles underlying the better management of the sample natural resources that may be generalized to other local governments and/or natural resources; and (5) make suggestions for the revision of governing legislation and on broader issues of organizational design at other levels in the government system,

This activity is an adjusted version following a fail attempt to implement the previous activity concept of “Strengthening Local Government Natural Resource Management Capability” during the period of July 2010 – February 2011.

This activity is to be implemented over a period of 7 months from 1 March 2011 to 30 September 2011. A consultant team comprising several specialists will be contracted to undertake this work. The Business Development Specialist will be offered a 60 working day contract with the possibility of additional days dependent upon project needs and performance. Alternative arrangements may be offered to an international consultant dependent upon availability and needs.

II. Goal and Objectives

Goal: The goal of the activity is to strengthen local government capability to manage natural resources sustainably to generate local economic development.

Objectives:

- Improved local government natural resource management (NRM) systems and organisational arrangements.

- Guidelines consisting steps and principles of natural resource management (NRM) systems including “asset capitalization” and “revenue sharing” concept for local Government
- Increased knowledge and capacity within local governments to implement and sustain new systems and to undertake the organisational development activities necessary to support the implementation of new management systems.
- Design of an improved organizational design at national and provincial levels of government.

III. Scope of Activity and Deliverables

The **Environmental Expert** will support a team leader who will lead a team that will perform the following services:

- (1) Desk review of literature, legislation and policy concerning NRM in Indonesia at the national level;

Deliverable: Literature review report

- (2) Detailed investigation into management and organisation and other aspects of capacity for the management of selected natural resources in two pilot provinces, and develop a pre-business plan as a part of the recommendations for both provinces;

Deliverables:

- Assessment report on current management and organization systems for the selected natural resources
- Report on management and organisational capacity on natural resources in pilot local governments, including recommendations for change in pilot local governments
- Draft of pre-business plan for selected districts in the two pilot provinces. Specific sectors for each district will be determined after a detail investigation has been done

- (3) Recommendations for capacity development and the introduction of change in the pilots;

Deliverable: Strategy for capacity development and the introduction of the proposed managerial changed for natural resource in pilot local governments.

- (4) Formulation of capacity development guidelines for other local governments and/or the management of other natural resources including “asset capitalization” and “revenue sharing” concept;

Deliverable: Generic guidelines on NRM for other local governments

- (5) Recommendations for the improvement of existing legislation and organisational arrangements at national and provincial levels pertaining to the selected natural resources

Deliverables: Recommendations for revisions to national legislation and recommendations on improving organisational arrangements

IV. Personnel Specifications

Environmental expert:

At least eight years years of relevant experience, including experience working on environmental issues in Indonesia, particularly those pertaining to the local level. The successful candidate will have an in-depth knowledge of decentralization and local autonomy in Indonesia and display a nuanced understanding of how this has impacted on environmental issues such as sustainable exploitation of resources and mitigation of environmental damage. The candidate will have an S1 in a relevant discipline, preference given to candidates holding a relevant S2.

HOW TO APPLY
