PERU LSMS 1994 QUESTIONNAIRE

Suhas D. Parandekar

February 13, 1997

Abstract

This is an English translation of the household questionnaire for the 1994 Peruvian Encuesta de Hogares sobre Medición de Niveles de Vida (ENNIV). The community and price questionnaires have not been translated. The World Bank and Instituto Cuanto were responsible for the collection of the data, but are not responsible for this English translation. The translation has been done by Suhas D. Parandekar of the Department of Economics, Tulane University, New Orleans, Louisiana, USA. Please e-mail any corrections or suggestions regarding the translation of the questionnaire to suhas@mailhost.tcs.tulane.edu, or visit his web site at http://studentweb.tulane.edu/~suhas. It is suggested that this translation be used concurrently with the Spanish versions of the questionnaire, the codebook and the dictionary of variables in order to be sure that users have all the information they need on skip patterns and special codes. In addition to the English translation, this document also provides the names of the relevant data sets and the names of the variables as they have been given in the data sets made publicly available by the World Bank. The typesetting convention that has been adopted is to have questions in **boldface type**, codes in **UPPERCASE**, and variable names in **BOLDFACE UPPERCASE** and within square brackets.
