Note: Individual country data are shown for Debtor Reporting System (DRS) countries only. Totals include estimates for countries not part of the DRS.

Table 1: EXTERNAL DEBT

Note: Country selection is based on size of external debt at end-2001. Short-term debt is debt with an original maturity of one year or less (and includes interest arrears). Debt due in the short term is debt due within a year and comprises liabilities to banks, debt securities issued abroad, and nonbank credits. Debt due in the short term is larger than short-term debt, but when these data are derived from different sources this may not hold. Reserves are the sum of a country's monetary authority's holdings of special drawing rights, its reserve position in the IMF, its holding of foreign exchange, and its holdings of gold (valued at year-end London prices)

Source: Debtor Reporting System and Joint BIS-IMF-OECD-World Bank statistics on external debt (also available on the World Bank website: <http://www.worldbank.org/data>).
