December 2007

Agricultural Distortions Working Paper 22, December 2007

This is a product of a research project on Distortions to Agricultural Incentives, under the leadership of Kym Anderson of the World Bank's Development Research Group. The authors are grateful for funding from World Bank Trust Funds provided by the governments of Ireland, Japan, the Netherlands (BNPP) and the United Kingdom (DfID).

This Working Paper series is designed to promptly disseminate the findings of work in progress for comment before they are finalized. The views expressed are the authors' alone and not necessarily those of the World Bank and its Executive Directors, nor the countries they represent, nor of the institutions providing funds for this research project.

# ECONOMIC AND TRADE INDICATORS FOR EUROPE'S TRANSITION ECONOMIES, 1960 TO 2004

**Damiano Sandri, Ernesto Valenzuela and Kym Anderson**

This compilation of data from the *World Development Indicators*, *FAOSTAT*, and *GTAP 6.0* databases provides comparative basic economic and trade indicators for ECA region. Within the region countries are sub-divided into sub-regions, and for each region and sub-region the case study countries are shown separately together with an aggregate of that sub-region's non-studied countries. Due to the very limited data availability, Serbia and Montenegro, and Bosnia and Herzegovina have not been included.

The tables begin with summary data for the period 2000-04, and growth data for 1990-94 and for 1995-2004. Then each one-page table shows annual data for the 15-year period from 1990 to 2004.

Apart from the series on black market premium (compiled by Easterly), on labor force, agricultural employment, agricultural land and the section on production, supply and export of agricultural commodities taken from the FAO, and those marked with \* in the table of contents computed from the GTAP Version 6.1 database (or Version 6.2 when specified), all the other data have been retrieved from the World Bank's *World Development Indicators* (April 2006). Definitions of the various variables can be found in the WDI section of the World Bank's website. Time series of applied ad valorem tariff (AHS) data from 1988 to 2005 are collected from UNCTAD-TRAINS using the WITS system<sup>1</sup>. These tariffs correspond to trade weighted HS6 digits compiled at GTAP sectoral level for primary agriculture and processed food, and aggregates for primary agriculture, processed food, and primary non agriculture. Effectively applied tariffs for

---

<sup>1</sup> <http://wits.worldbank.org/>. In the absence of a corresponding trade flow for a given tariff, WITS seeks for a matching trade flow in COMTRADE, either by direct or inverted trade (collecting exports to region x). These are exclusively ad valorem tariffs and thus do not include ad valorem equivalent of specific tariffs.

the year 2001 reported in the last table of the basic trade indicators come instead from the GTAP6.1 database. They are obtained through a joint CEPII / ITC project, known as MAcMAps, which calculates HS6 bilateral tariff including ad valorem tariff equivalent of specific and compound tariffs and key non-tariff barriers such as tariff rate quotas (TRQs).

Five-year averages for the period 2000-2004 are computed by averaging all the available annual data within the period. However, average percentages and ratios for single countries between two variables are computed by considering only those years for which observations are available for both series. Growth rates are calculated consistently with WDI statistical procedures, i.e. by fitting a linear regression trend to the logarithmic annual values whenever at least half of the observations in the period are available. The revealed comparative Advantage (RCA) indexes are computed as the product group's share of a region's exports as a percentage of that product group's share of global merchandise exports. The service sector is derived as a residual, from GDP less agriculture and industry.

The available tables and indicators are:

### **Description of aggregate sectors, as referred to in the GTAP database**

## Description of aggregate sectors, as referred to in the GTAP database

### Primary Agriculture

GTAP sector	description
pdr	Paddy rice
wht	Wheat
gro	Cereal grains nec
v_f	Vegetables, fruit, nuts
osd	Oil seeds
c_b	Sugar cane, sugar beet
pfb	Plant-based fibers
ocr	Crops nec
ctl	Cattle,sheep,goats,horses
oap	Animal products nec
rmk	Raw milk
wol	Wool, silk-worm cocoons

### Other Primary

GTAP sector	description
frs	Forestry
fsh	Fishing
coa	Coal
oil	Oil
gas	Gas
omn	Minerals nec

### Processed Food

GTAP sector	description
cmt	Meat: cattle,sheep,goats,horse
omt	Meat products nec
vol	Vegetable oils and fats
mil	Dairy products
pcr	Processed rice
sgr	Sugar
ofd	Food products nec
b_t	Beverages and tobacco products

### Other Manufacturing

GTAP sector	description
tex	Textiles
wap	Wearing apparel
lea	Leather products
lum	Wood products
ppp	Paper products, publishing
p_c	Petroleum, coal products
crp	Chemical,rubber,plastic prods
nmm	Mineral products nec
i_s	Ferrous metals
nfm	Metals nec
fmp	Metal products
mvh	Motor vehicles and parts
otn	Transport equipment nec
ele	Electronic equipment
ome	Machinery and equipment nec
omf	Manufactures nec
