

TRANSPORT AND CLIMATE CHANGE: KEY STATISTICS

Transport sector:

- **15** percent of GHG emissions
- **24** percent of energy-related emissions
- **95** percent from oil-based fuels in internal combustion engines
- **65** percent from passenger transport and **35** percent from freight transport

TRANSPORT AND CLIMATE CHANGE: KEY STATISTICS

Developing countries:

- About **32** percent of transport GHG emissions
- But growing at **3-5** percent annually (c.f. with 1-2 percent in developed countries)
- Developing countries will be nearly **half** transport emissions by 2020

TRANSPORT AND CLIMATE CHANGE: KEY STATISTICS

Modes and greenhouse gases:

- **76** percent from road transport
- **13** percent from aviation
- **10** percent from water transport
- **2** percent from railways
