

Worldwide Governance Indicators for 2006

This table reports the most recent 2006 data on six dimensions of governance from the Worldwide Governance Indicators Project:

Voice & Accountability
Political Stability and Absence of Violence/Terrorism
Government Effectiveness
Regulatory Quality
Rule of Law
Control of Corruption

Data for earlier years between 1996 and 2005, together with all the individual indicators underlying these six aggregate indicators, are available at www.govindicators.org

Country scores are reported as percentile ranks, with higher values indicating better governance ratings (refer to columns labelled "rank"). Percentile ranks indicate the percentage of countries worldwide that score below each country. For example, a country with a percentile rank of 70 has 70 percent of countries scoring worse than it, and 30 percent of countries scoring better.

Governance is difficult to measure, and so all measures of governance are necessarily imprecise. A unique feature of the WGI is that it transparently reports this imprecision. The percentile ranks for each country are accompanied by a range of likely values (refer to columns labelled "lower" and "upper"). There is a 90 percent chance that the country's governance rank is between these lower and upper values.

Country scores are colour-coded as follows:
