

(Updated August 2011)

Note: This OP 3.10, Annex D replaces the version dated July 2010. The revised terms are effective for all loans for which invitations to negotiate are issued on or after July 1, 2011 (except the new financial terms for IDA credits on “blend terms” and for countries under the small island exception apply to all credits approved on or after July 1, 2011 – see footnotes 6 and 8).

IBRD/IDA and Blend Countries: Per Capita Incomes, Lending Eligibility, and Repayment Terms

- For questions on per capita income estimates, please contact the Director, DECDG
- For questions on IDA eligibility and IDA terms, the Director, CFPIR
- For questions on creditworthiness and IBRD terms, the Director, CFRCR
- For questions on customized IBRD repayment terms, the Director, Banking and Debt Management Department, BDM

The following 2010 per capita income guidelines apply for operational purposes:

- US\$1,005 or less for granting civil works preference to eligible domestic contractors in evaluating civil works bids procured under international competitive bidding (see [OP BP 11.00](#), Procurement);
- US\$1,175 as the operational cutoff for IDA eligibility; [US\$1,915 as the historical ceiling for IDA eligibility];
- US\$1,175 or more for IBRD terms;
- US\$6,925 or more for initiating the IBRD graduation process.

(Updated August 2011)

Key

NA = Estimates are available in ranges only

A = Annuity

LRP = Level repayments of principal

1. World Bank Atlas methodology; 2010 per capita GNI (Gross National Income, formerly GNP) figures are in U.S. dollars.
2. Countries are eligible for IDA on the basis of (a) relative poverty and (b) lack of creditworthiness. The operational cutoff for IDA eligibility for FY12 is a 2010 GNI per capita of US\$1,175, using Atlas methodology. To receive IDA resources, countries must also meet tests of performance. An exception has been made for some small island economies (see footnote 8). In exceptional circumstances, IDA also extends eligibility temporarily to countries that are above the operational cutoff and are undertaking major adjustment efforts but are not creditworthy for IBRD lending.
3. IDA-only countries except for limited IBRD lending for enclave projects.
4. Countries that are classified as least developed countries (LDCs) by the United Nations (see OP 3.10, para. 39).
5. IDA regular term credits have a 10-year grace period, and IDA blend term and hard-term credits have a 5-year grace period.
6. The maturity for IDA regular credits is 40 years, with principal repayable at 2 percent per annum for years 11-20 and 4 percent per annum for years 21-40. Effective from July 1, 2011, the formerly blend and hardened terms have been consolidated into one blend credit instrument with a maturity of 25 years, a grace period of 5 years, a 1.25 interest charge, and with principal repayable at 3.3 percent per annum for years 6-15 and 6.7 percent per annum for years 16-25. The new blend terms will apply to credits approved on or after July 1, 2011. IDA credits include an acceleration clause, providing for the possibility of doubling of principal payments from creditworthy borrowers where per capita income remains above eligibility thresholds.
7. Loans/credits in nonaccrual status as of June 30, 2011. When these countries reengage with IDA, a new DSA will determine their grant eligibility status. General information on countries with loan/credits in nonaccrual status is available from the Credit Risk Department in Finance (CFRCR).
8. IDA eligible countries under the small island economy exception. For credits approved on or after July 1, 2011, the financing terms for the small island blend countries are changed from blend credit terms to regular IDA credit terms.
9. The GNI per capita has been above the operational cutoff for IDA eligibility for more than two consecutive years, therefore the borrower will be subject to IDA lending on blend terms.
10. The country's GNI per capita has been above the IDA operational cutoff for either one or two years, and the borrower will continue to access IDA resources on regular terms until the GNI per capita continuously exceeds the cutoff for three years.
11. Countries eligible for hard-term IDA credits as defined in IDA16, effective July 1, 2011. These are all blend countries, excluding small island blends. The access to hard-term credits is expanded in proportion to the countries' performance-based allocation. The maturity of hard-term credits is 25 years, with a 5 year grace period, and a 3.3 percent of principal repayable per annum for years 6-15 and 6.7 percent per annum for years 16-25. Standard IDA service and commitment charges apply plus a fixed interest charge for the life of each credit. The interest rate is set annually. For credits approved on or after July 1, 2011, the interest rate is 2.8 percent.
12. Grant eligibility varies by fiscal year and is based on the IDA grant framework in accordance with the IDA16 Agreement entitled "Additions to IDA Resources: Sixteenth Replenishment—IDA16: Delivering Development Results" (February 15, 2011).

Changes during current fiscal year

1. Sri Lanka changed from IDA only borrower to Blend borrower status, effective July 18, 2011.
2. The GNI per capita for Timor-Leste was revised as a result of recent revisions to national statistics.

(Updated August 2011)

Changes during previous fiscal year

1. Azerbaijan changed from a Blend borrower to IBRD borrower status, effective as of July 1, 2011.
2. The Republic of Marshall Islands was reclassified from an IBRD borrower to IDA only borrower status, effective as of July 1, 2011.
3. The Federated States of Micronesia was reclassified from an IBRD borrower to IDA only borrower status, effective as of July 1, 2011.
4. April 21, 2011: Guinea came out of nonaccrual status to IDA.
