

Report No. 44248-TH

Thailand Investment Climate Assessment Update

June 2008

Poverty Reduction and Economic Management Sector Unit
East Asia and Pacific Region

Document of the World Bank

CURRENCY EQUIVALENTS

Currency Unit	=	Thai Baht
US\$1	=	33.3 THB

ACRONYMS AND ABBREVIATIONS

ADB	Asian Development Bank
BOI	Board of Investment
BOT	Bank of Thailand
CEO	Chief Executive Officer
CPI	Consumer Price Index
DEP	Department of Export Promotion
EGAT	Electricity Generating Authority of Thailand
FDI	Foreign Direct Investment
FTPI	Foundation of Thailand Productivity institute
GDP	Gross Domestic Product
GMS	Greater Mekong Sub-region
GNI	Gross National Income
HS	Harmonized System
IC	Investment Climate
ICA	Investment Climate Assessment
ICD	Inland Container Depot
ICT	Information and Communication Technologies
IPP	Independent Power Producer
IT	Information Technology
KEI	Knowledge Economy Index
MEA	Metropolitan Electricity Authority
MWA	Metropolitan Waterworks Authority
MLR	Minimum Lending Rates
MNC	Multi-National company
NESDB	National Economic and Social Development Board
NRCT	National Research Council of Thailand
NSTC	National Science and Technology Policy Committee
NSTDA	National Science and Technology Development Agency
PEA	Provincial Electricity Authority
PICS	Productivity and Investment Climate Survey
PPP	Public-Private Partnerships
PWA	Provincial Waterworks Authority
R&D	Research and Development
RTG	Royal Thai Government
SAIDI	Standard Average Interruption Duration Index
SAIFI	Standard Average Interruption Frequency Index
SG	Sales Growth
SME	Small and Medium-sized Enterprise
SPP	Small Power Producer
TEU	Twenty-foot Equivalent Unit
TFP	Total Factor Productivity
VA	Value-Added
VAT	Value-Added Tax
VAL	Value-Added per Worker

Regional Vice President:	James W. Adams
Country Director:	Ian Porter
Sector Director and Acting Chief Economist:	Vikram Nehru
Lead Economist:	Mathew Verghis
Task Team Leader:	Xubei Luo

ACKNOWLEDGEMENTS

This report is the result of fruitful collaboration between Thailand's Ministry of Industry (MOI), Office of the National Economic and Social Development Board (NESDB), Foundation for Thailand Productivity Institute (FTPI), and the World Bank. The main data source for this report is the Thailand Productivity and Investment Climate Survey (PICS) which was funded by the Ministry of Industry and carried out by the FTPI under the overall guidance of the PICSII Technical Steering Committee led by the Ministry of Industry. The report also benefited from valuable inputs from the Bank of Thailand (BOT), National Statistics Office (NSO), National Science and Technology Development Agency (NSTDA), the Federation of Thai Industry, and the Thai Listed Firm Association.

The report was written by a World Bank team which includes Xubei Luo (Task Leader, EASPR), Kirida Bhaopichitr (EASPR), Jean-Jacques Dethier (DECRS), Vatcharin Sirimaneetham (EASPR), and Takanobu Terada (University of Maryland). Shubham Chaudhuri (EASPR) managed the project until May 2008.

The report builds on the findings of *Thailand Investment Climate, Firm Competitiveness and Growth* report (World Bank, 2006). It was prepared under the overall guidance from Mathew Verghis (Lead Economist). Vikram Nehru (Sector Director) and Ian Porter (Country Director) provided oversight. The World Bank peer reviewers for this report were Gary J. Fine (Senior Private Sector Development Specialist, ECAVP) and Giuseppe Iarossi (Senior Economist, AFTFP). Lynn M. Gross skillfully formatted and prepared the report. Susan Middaugh did the editing.

The report team benefited from inputs and consultations at the different stages of the report preparation from the stakeholders in Thailand. We would like to sincerely thank the following government offices and officials: the Ministry of Industry for funding the survey; PICSII Technical Steering Committee chaired by Witoon Simacholedee, Deputy Permanent, Ministry of Industry for its oversight of the survey; Arkhom Termittayapaisith, Deputy Secretary General, NESDB, and the NESDB staff for their collaboration in providing insights and inputs to the report as well as conducting the qualitative interviews and organizing focus groups meetings for the study; Dr. Phanit Laosirirat, Director, Foundation of Thai Productivity Institute, and the team at the FTPI that conducted the survey led by Nantaphorn Angatichart and Ketmanee Ausadamongkol; Dr. Somchai Harhirun and his staff at the Office of Industrial Economics for sharing the industry surveys and valuable comments on the report; and the National Statistics Office for sharing the industrial censuses.

The team greatly appreciates the inputs and insights provided by key players in the Technical Institutes and the private sector. They are as follows: Vallop, Thailand Food Institute; Vallop Tiasiri, Director, Thailand Automotive Institute; Pattana Sudhirakuljao, Executive Director of Thai Garments Association; Dej Pattanasethpong, President of Thai Garments Association; Chen Namchaisiri, Chairman of Textiles Club, Federation of Thai Industries; Phaiboon Poocharoen, Tri Petch Isuzu Sales; Thavorn Chalassathien, Chairman, Auto-parts industry club, Federation of Thai Industries & Denso International

(Thailand); and Paiboon Polsuwanna, President, Food Processing Cluster, Federation of Thai Industries.

The team is grateful to Albert Zeufack for survey design at the early stage, to Maximilian Hirn for valuable inputs, and to Deborah Bateman, Luis Benveniste, Deepak Bhattasali, Ana Margarida Fernandes, Shabih Mohib, Zhi Liu, Kazi Matin, Chanin Manopinewes, Pajnapa Peamsilapachulchorn, Thomas Rose, Cheanchom Thongjen, Charles Udomsaph, and Tunc Tahsin Uyanik for useful suggestions. The team is also indebted to the workers and managers across Thailand who devoted their time and provided information for the Productivity and Investment Climate Surveys and the interviews on regulatory issues.
