**MEXICO'S TRANSITION TO A KNOWLEDGE-BASED ECONOMY: CHALLENGES AND OPPORTUNITIES**

Yevgeny Kuznetsov and Carl J. Dahlman

Mexico's service sector (tourism and health services, for example) provides particularly fertile ground for the application of knowledge. Although this transformation would be based on the main economic

tenets of the North American Free Trade Agreement, the effort must go further by focusing on second-generation reforms aimed at making major improvements in the country's capacity to generate knowledge and transform it into wealth.
